7 BEST 42 GOOD 12 AVOID

BEST CHOICE	Type	Method	Location
	Salmon, Atlantic Sake, Salmon	Indoor recirculating tank	Worldwide
BEST CHOICE	Type	Method	Location
	Salmon, Chinook King Salmon, Quinnet	Indoor recirculating tank	Worldwide

You have to click on this tab to find AK salmon as it is deferred to as MSC certified

Once you click on the “eco-certifications” link it reveals all those salmon species (farmed and wild) that are certified by one of the SFW benchmarked certification schemes. This applies for nearly all Alaska species.

The screenshot shows the Monterey Bay Aquarium Seafood Watch website. The navigation bar includes links for Ocean Issues, Seafood Recommendations, Consumers, Businesses & Organizations, About Us, and Resources. A search bar contains the word "salmon". Below the search bar, there are two circular filters: "3 ASC" and "15 MSC". A red arrow points to the "Eco-Certifications" tab. The search results are displayed in a table with columns for Type, Method, and Location. The second row of results is circled in red, showing "Salmon, Chinook" with the location "Marine Stewardship Council Certified Fisheries (Alaska)".
