Alaska RFM Quick Reference Tool

- Alaska Responsible Fisheries Management (RFM) is a third-party certification program for wild-capture fisheries, similar to the Marine Stewardship Council (MSC), and Best Aquaculture Practices (BAP), and Aquaculture Stewardship Council (ASC) on the aquaculture side.

- RFM provides Alaska fisheries and seafood customers with a credible and cost-effective choice in seafood certification.

- Similar to other wild-capture seafood certification programs, Alaska RFM provides credible standards for sustainable or responsible fishing and supply chain traceability.

- Alaska RFM has two certification standards:
  1) Fisheries Standard
  2) Chain of Custody Standard (CoC)

- Fisheries are independently assessed and scored against a set of criteria, and must meet these criteria in order to become certified. Certification is valid for five years with annual surveillance audits.

- Organizations in the supply chain must undergo a CoC audit to receive their CoC certification, which is valid for three years with annual surveillance audits.

- RFM allows companies to demonstrate responsible sourcing to their customers. This is important; as today’s retailers and foodservice operators need to be sure they offer their customers seafood from fisheries that are certified through credible certification programs.

Alaska RFM Key Attributes

- Based on internationally recognized criteria from the United Nation’s FAO
- Consumer-facing eco-label – Alaska RFM Certified Seal has **ZERO logo-licensing fees**
