SUSTAINABILITY

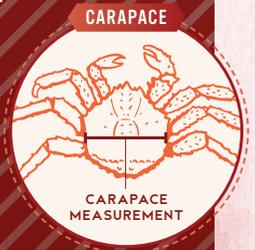

IN ALASKA, PROTECTING the future of both the stocks and ENVIRONMENT TAKE PRIORITY

over opportunities for commercial harvest. State and federal agencies collaborate to determine each year's harvest limits, and monitor the season in real-time to determine when these limits have been met. Additional measures, such as the catch share programs and a stringent on-board observer program ensure sustainably harvested wild Alaska red king crab will be available for generations to come.

The red king crab harvest is

LIMITED BY THE "THREE S'S" - SIZE, SEX, AND SEASON.

Only males with a carapace of at least 6.5 inches can be caught, and harvest is not permitted during mating and molting!

CERTIFIED

The Alaska king crab fishery is certified to an independent certification standard for sustainable fisheries:

ALASKA RESPONSIBLE FISHERIES MANAGEMENT (RFM)

GASTRONOMY

VERY SWEET • FIRM BUT TENDER
RICH AND LUXURIOUS

"Alaska red king crab has a natural sweetness that comes to the forefront with simple preparations. Poach the meat in drawn butter and place it atop your avocado toast, or just eat it warm straight from the shell with a lemon and melted butter on the side."

Addie Camp Restaurant | Soldotna, Alaska

FAMOUS (SHELL)FISH!

THE BERING SEA RED KING CRAB FISHERY IS PROMINENTLY FEATURED AS PART OF THE DISCOVERY CHANNEL'S HIT REALITY SHOW

"Deadliest Catch."

COOKING PROFILE

METHOD Boiling, grilling, steaming, baking—the simpler the better!

PRE-COOKED Sweet and rich flavor locked-in and ready for re-heating

WILD HABITAT

The Wild Alaska Red King Crab:

- The largest of all king crab species, with a leg span often reaching 5 ft. and weighing up to 24 lbs.
- Large adults have few natural predators aside from opportunistic predation when their shells are weak after molting.
- Prolific breeders, female crab release between 50,000 and 500,000 eggs annually.
- Traveling in large groups called pods, red king crab are known to stack on top of one another to ward off predators.

Regal and Lavish

RED KING CRAB

is historically the most commercially valuable shellfish in Alaska, roughly 854 million pounds, worth \$2.5 billion* has been harvested since 1975.
